LIFE INSURANCE COMPANY.

THE NEW ENGLAND

Mutual Life Insurance

COMPANY,

OF BOSTON, MASS.,

Have just declared a DIVIDEND ON PREMIUMS paid and earned the last five years, payable in cash to all the policy holders, as follows:—

36 per cent. to all members since	1853
36 " " "	1848
39¼ " " "	1843

The Dividend is declared on the following basis:—

Accumulated Fund, Dec. 1, 1858		$1,295,622 21
Reservation for re-insurance at the tabular rate	$830,922 21	
Estimated deterioration of lives otherwise than by difference of age	88,000 00	
Estimate of losses not heard from	20,000 00	
Contingencies of investments, 5 per cent. on the amount of property of the Company	69,781 00	
Reserve for small bills not presented, and charges accruing at agencies on business not yet matured	1,816 00	
Amount of surplus for distribution	285,763 00	
		$1,295,622 21

Late members receive the smaller dividend, as they were not called upon to contribute toward the guarantee capital.

The surplus is divided among all the members IN CASH, thus affording a good and certain rate of interest upon the outlay of premiums, and avoiding the unnecessary and uncertain tendency of large accumulations of unpaid dividends, erroneously called capital.

One half of the first five annual premiums on life policies loaned to insurers, if desired; the remaining half may be paid quarterly.

This is the oldest American Mutual Life Insurance Company, and one of the most successful.

Insurance may be effected for the benefit of married women, beyond the reach of their husbands' creditors. Creditors may insure the lives of debtors.

WILLARD PHILLIPS, President.

IMPORTANT

TO FOUNDERS AND OTHERS GETTING UP PATTERNS.

A new and valuable improvement in making Patterns.—The subscribers having received letters patent, are prepared to MAKE PATTERNS AT A MUCH REDUCED PRICE, or will sell RIGHTS, and learn parties the PROCESS OF MAKING and MOULDING PATTERNS to be cast in metal by this process. The most difficult and expensive patterns now made of wood, copper, &c. for Hollow ware, Corrugated Castings, Cone Boxes, Pipes, Traps, Elbows, &c., can be substituted by this invention at about ONE-FIFTH THE COST, and in LESS THAN ONE-FIFTH THE TIME usually required, and of a MORE REGULAR UNIFORM THICKNESS than by any other method. For further information inquire at the Williamsburg Iron Foundry, corner of Eighth and Ainslie Sts., near Grand.

Specimens of Castings made by this process can be seen at 242 Water Street, New York.

JOHN ALEXANDER,
JAMES RITCHIE,

Entered according to an Act of Congress, in the year 1870, by Sandford, Thurlow & Co. in the Clerk's Office of the District Court for the Southern District of New York.
